FAQs

Phoenix Max

The Phoenix Max is TOPDON's newest cutting-edge automotive diagnostic scanner. With a 13.3" screen, this all-in-one tool offers a wide array of functionalities that will expand any technician's capacity to complete even more jobs.

The Phoenix Max includes a 4-channel oscilloscope, ADAS compatibility, and Topology Mapping that shows all car systems in one view. Its updated MDCI (Modular Diagnostics & Communication Interface) includes the latest protocols, allowing professionals to perform more complex repairs on various automotive and heavy-duty vehicles with optional add-on software.

Get More Done

Automotive and Heavy-Duty coverage in one tool, it just makes sense. 2 years of automotive and 1 year of HD updates keep supporting the latest models.

*Heavy-Duty Cables and Software are optional, sold separately.

HD Updates

4-Channel

The included Phoenix Scope allows you to diagnose component and circuit faults with even more precision. With its color-coded channels, you can analyze and compare multiple components with ease.

Fix those hard-to-find intermittent problems by evaluating sensors, ignition components, pressure/vacuum related faults, and much more with pinpoint accuracy.

Scope**

Cloud-Based Programming and Coding

Elevate your game with Cloud-based programming for brands like Benz, BMW, Volkswagen, Audi, Skoda, Seat, Porsche, Land Rover, Jaguar, Hyundai, Nissan, Subaru, Renault, and online coding for Audi, BMW, and Porsche.

13+ Car Brands

Phoenix MDCI Pro

TOPDON's Phoenix Max comes with the Phoenix MDCI Pro, a VCI that supports J2534, DoIP, CanFD, D-PDU, and RP1210 protocols. This MDCI Pro's unparalleled coverage allows you to offer OE-level services to newer and more modern vehicles. With the Phoenix MDCI Pro, you will never be forced to outsource!

The Phoenix MDCI Pro Has You Covered

Big Display for Big Productivity

Featuring a large 13.3", 1920 x 1200 display, 8G RAM/256G ROM, and utilizing Android 9, the Phoenix Max will take on whatever you throw at it with fast and smooth operation.

Excellent Performance

All Day Battery Life

Convenient docking station included so your Phoenix Max is always charged and within reach.

The 18600 mAh, 3.8V battery will power through the day, just like you. 8 hours of run time will ensure you're never down.

Docking Station

Extended Capability

Compatible with Phoenix ADAS, BTMobile Pros, T-Ninja Box.

Battery Test ADAS Calibration Key Programming

Explore More Features On the Phoenix MAX

35 maintenance services for mainstream vehicle models.

Topology map granting a clear picture of relational vehicle systems and status.

Full-system diagnostic (Engine, Transmission, Airbag, ABS, ESP, TPMS, Immobilizer, Gateway, Steering, Radio, Air Conditioning) for over 200 vehicle models.

5 Full-system diagnostic basic functions: access ECU info, read DTCs, clear DTCs, read data stream, active test.

More Features

AutoVIN for automatic vehicle identification.

Guide Function for VAG.

The FCA Secure Gateway Module(SGW) unlocks the FCA vehicle, in order to perform functions such as clearing DTCs, bi-directional testing and calibration.

Data stream recording for users to play back diagnostic activities.

VAG GUIDED FUNCTIONS

Guided procedures and functions streamline the repair process. Follow the prompts for easy and convenient operation, suitable for VW, Audi, Skoda and SEAT vehicles.

EXPANDED FUNCTIONS

Compatible with the **Phoenix ADAS Mobile**

Combined with TOPDON's New Calibration System, the Phoenix Max is capable of calibrating advanced driver-assistance systems, such as ACC, AEB, LDW, LKA, NVS, RCW, BSD, and more. You can use the wide array of targets to bring new capabilities and more revenue to your shop.

Compatible with the **BTMobile ProS**

Turn the Phoenix Remote Into a Battery Tester! This scanner is compatible with the BTMobile ProS, allowing you to view all battery info and perform battery, cranking, and charging tests.

Compatible with the **T-Ninja Box**

It allows users to read and write key chip data, generate special keys, and more. This cutting-edge programming tool is compatible with the most prominent ECU, MCU, and EEPROM Manufacturers.

OTHERS

1. OBD Full Functions

Supports 10 kinds of OBD Modes.

2. Auto Vin

The Phoenix Smart automatically uses the right diagnostic software after identifying the vehicle through its VIN.

3. Auto Scan

Automatically scan all the on-board systems.

4. Tool Feedback

Feedback can provide better after-sales service to customer.

5. One-Tap Upgrades

Updating is easy and convenient.

First connect to WIFI. After selecting all software, tap Update to upgrade all software with one tap.

6. Save and Share Reports

7. FCA Secure Gateway Access

8. Topology Mapping

FAQs

Q Can I use the same type of charger to charge the tablet?

A No, please use original charger. Our company is not responsible for any damage and economic loss caused by using charger, which is not provided by TOPDON.

Q How can I conserve power?

A Please turn off the screen while the equipment isn't used, set a shorter standby time, and/or decrease the brightness of the screen.

Q The tablet cannot be turned on after charging.

A Possible reasons:

The equipment has not been used for a long time, and the battery is too low.

Solution:

Charge it for more than 2 hours before turning it on.

Problem of Charger:

If there is a quality problem, please contact the dealer or after-sales service of TOPDON.

Q Why can't register?

A Possible reasons:

The tablet isn't connected to a network;
Your email has been registered;
There is no verification code in the email box.

Solution:

Please make sure the network is connected;
Use another email to register or log in with the username registered by the email (If you forget the username, you can retrieve it by email);
Check if the email address is valid and resend the code.

Server problem:

Server maintenance. Please try again later.

Q Why can't log in?

A Possible reasons:

The tablet isn't connected to a network;
The user name or password is incorrect.

Solution:

Please make sure the network is connected;
Check the user name and password Contact TOPDON
after-sales service or regional sales to retrieve the user name
and password.

Server problem:

Server maintenance. Please try again later.

Q Why can't activate the equipment?

A Possible reasons:

The equipment isn't connected;
The serial number and activation code are inputted wrong;
The activation code is invalid;
The configuration is empty.

Solution:

Make sure the network is connected;
Check the serial number and activation code and make sure they are correct (serial number 12 digits, activation code 8 digits);
Contact TOPDON after-sales service to get support;
Contact TOPDON after-sales service or regional sales.

Server problem:

Server maintenance. Please try again later.

Q Notes: the equipment is not activated during update software?

A Possible Cause:

The Phoenix MDCI Pro connector may not be activated during registration.

Solution:

Use the serial number and activation code to activate the connector. Steps are as follows: Tap [Settings]->[Activate Phoenix MDCI Pro] Enter the correct serial number and activation code in the interface, and tap [Activate].

Q Software upgrade failed.

A Possible reasons:

The equipment is not connected to the Internet;
The user name or password is wrong. The equipment has not enough memory.

Solution:

Check its network connection;
Check the user name and password. Uninstall irrelevant applications and delete uncommonly used vehicle software (enter setting -> diagnostic software clear -> remove software to operate).

Server problem:

Server maintenance, please try again later.

Q There is no power in the Phoenix MDCI Pro dongle after connecting to the vehicle's DLC port.

A Possible reasons:

Poor contact of vehicle's DLC port;
Too low voltage of the vehicle battery;
Damage of the Phoenix MDCI Pro dongle.

Solution:

Plug out the Phoenix MDCI Pro dongle, and then plug it in again;

.Recharge the vehicle battery;

.Replace the vehicle battery if it is damaged;

Contact TOPDON after-sales service to get support.

Q The tablet cannot establish a connection with the Phoenix MDCI Pro dongle.

A Possible reasons:
Poor contact of the Phoenix MDCI Pro dongle;
The firmware is damaged.

Solution:

.Plug out the Phoenix MDCI Pro dongle, and then plug it in again;

.Perform the Phoenix MDCI Pro Bluetooth pairing again.

Enter the settings and tap "Fix Connector Firmware/System*" to fix the firmware.

Q How about non-standard OBDII Phoenix MDCI Pro connector.

A There are several non-standard adapters in the box, please follow the instructions to connect.

Q Communication error with vehicle ECU?

A Please confirm: Whether the vehicle is equipped with the system. Whether the Phoenix MDCI Pro is correctly connected and whether the vehicle ignition switch is ON. If all are normal, send vehicle production year, model and VIN number by Feedback feature.

Q What to do if the connector is missing?

A Contact TOPDON after-sales service or regional sales

Q The downloaded diagnostic software is inconsistent with the serial number.

A There are several connectors registered under the equipment account, and the serial number of right connector has not been selected. Enter the settings-[Phoenix MDCI Pro] and select the right serial number of connector. Delete the software with problems, then enter the upgrade center to download the diagnostic software again.
